

### The **optomap**® Retinal Exam:

- ✓ Is fast, easy, and comfortable
- ✓ Provides a permanent record for annual review
- ✓ Assists the doctor with monitoring change in your eye health

An **optomap**® Exam gives us a panoramic image of the surface of your retina. These images help the doctor assess the health of your eyes and check for conditions including macular degeneration, glaucoma, and retinal detachments. *These problems can threaten vision, sometimes without warning or symptoms.*

Serious health problems unrelated to the eye such as diabetes, hypertension, heart disease, some cancers, and autoimmune disorders, can also be detected with an **optomap**® Exam. **Early detection could help save your vision.**

**The cost of the **optomap**® Exam is only \$39.** *(You may use your HSA or Flex Spending Account)*

\_\_\_\_\_ I understand that the **optomap**® retinal exam will be performed today and do not have any questions.
